🗂 Experience

Software Engineer Specialist `Full-time`
🏢 One Mount Group 📍 28Bis Mạc Đĩnh Chỉ, Dakao District 📅 Jan 2020 - Present

At One Mount Group, I initially joined as a "Senior Developer," focusing on the development and refinement of major web applications like OPS for internal operations and Merchant Site for external partner logistics.
Transitioning to the Loyalty domain, I spearheaded strategic projects, notably the "CDOE Conversion" for technological autonomy and cost reduction, and TCB - PS2 to integrate partners into the Loyalty system, leading to my promotion to "Software Engineer Specialist." I also took on mentoring roles, guiding team members in project execution and interviewing potential talent to strengthen our company's expertise.

Senior Developer `Full-time`
🏢 QUANTIC Ltd 📍 176/4 Lê Văn Sỹ, Phú Nhuận District 📅 Feb 2018 - Jun 2020

- Participated in outsourcing projects for international clients, including notable Japanese firms like Toshiba and various European companies.
- Engaged in both maintenance and new development projects, ensuring timely and efficient project execution.
- Collaborated with the team to analyze client business requirements and develop solutions that meet their needs effectively.
- Continuously expanded technical expertise by adopting a diverse range of technologies, including .Net (C#), Java (SpringBoot, Java Swing, Java Web, SA Struct), NodeJs, ReactJS, PHP, and Wordpress, to cater to the unique demands of each project.

🏛 Education

Bachelor of Computer Science and Software Engineer. `BA Degree`
🎓 Hoa Sen University 📍 08 Nguyễn Văn Tráng, 1 District 📅 2008 - 2012

Holding a Bachelor of Computer Science and Software Engineering, my academic foundation encompasses a comprehensive understanding of computational theory, software development principles, and systems design. This rigorous program honed my analytical skills, problem-solving abilities, and proficiency in various programming languages, preparing me for tackling complex software challenges in dynamic environments.

Technical Degree in ASP.NET and iOS. `Training Course`
🎓 Computational Science Center - HCMUS 📍 227 Nguyễn Văn Cừ, 1 District 📅 Feb 2010 - Jun 2012

- Developed an e-commerce website using ASP.NET, enhancing the shopping experience with a user-friendly interface and secure payment systems.
- Created a taxi booking application for iPhone, offering a seamless ride-hailing service with real-time tracking and easy payment options.

🧰 One Mount Group

TCB OPS Portal
🗂 Web app   👤 Technical Lead   📅 June 2022 - Present

As the Technical Lead for the "TCB OPS Portal" project:
- I was responsible for the project's architectural design, selecting technology solutions, and establishing development processes to meet the demands of a large web application encompassing multiple business domains, modules, and teams.
- I ensured scalability for future feature expansions and team additions.
- My role included code review, setting up project environments and CI/CD pipelines, training team members on technologies and processes, providing tech solutions to teams, mentoring freshers, and participating in recruitment to strengthen our project team.

`Mirco FE` `ReactJs` `TailwindCss` `Monorepo` `Ant Design` `Nx` `Redux` `Zustand`

Revamp VinID.net
🗂 E-commerce   👤 Technical Lead   📅 June 2023 - Present

I spearheaded the redevelopment of the existing VinID.net website using NextJS, focusing on enhancing performance, SEO, and UI/UX. I was responsible for code reviews and guiding team members in project development methodologies, ensuring a collaborative and efficient approach to achieving our project goals.

`Turbo Pack` `ReactJs` `NextJs` `TailwindCss` `Monorepo` `Radix UI` `Shadcn UI`

VinID - OPS
🗂 Web App   👤 Senior Developer   📅 Jan 2020 - Present

As a key contributor to the OPS project, I played a pivotal role in enhancing the web application that supports the operational framework of VinID and VinGroup's ecosystem. My responsibilities included streamlining and refactoring technical debt to improve system efficiency, as well as maintaining and innovating new features to meet the evolving needs of various teams and business domains within the organization. This role demanded a proactive approach to problem-solving and a continuous commitment to technological advancement and operational excellence.

`Angular` `MUI`

VinID - Merchant Site
🗂 Web App   👤 Senior Developer   📅 Jan 2020 - Present

"Merchant Site" is a project similar to the "OPS" project mentioned above, but built using ReactJS and catering to external partners of VinGroup.

`ReactJS` `MUI`

VinID - Merchant Site
📁 Web App 👤 Senior Developer 📅 Jan 2020 - Present

"Merchant Site" is a project similar to the "OPS" project mentioned above, but built using ReactJS and catering to external partners of VinGroup.

`ReactJS` `MUI`

One Job
📁 Web App 👤 Technical Lead 📅 Jan 2022 - June 2022

"OneJob" is an internal project aimed at building a tool that helps the BE team monitor, operate, and schedule Service Workers and Cron Jobs in the system effectively. As the project lead, I was responsible for building and structuring the project, ensuring its efficiency, and making it simple enough for Fresher and BE team members to participate in development.

`ReactJs` `TailwindCss` `MUI` `Tauri`

🗄 Quantic Ltd

stonecurators.com
📁 E-commerce 👤 Senior Developer 📅 2018 - 2019

"stonecurators.com" project is an e-commerce website specializing in granite, I spearheaded the development of a user-centric tool using ReactJS, enabling seamless granite information retrieval. My responsibilities extended to feature development, business analysis, and crafting PHP plugins and functionalities to integrate this search tool with the main WordPress site, ensuring a smooth interface between the database and the web pages.

`ReactJs` `PHP` `Wordpress`

scores.nuvaldata.com
📁 E-commerce 👤 Developer 📅 2015 - 2016

A website dedicated to calculating the nutritional value of foods using PHP, I was entrusted with the project's maintenance. My focus was on ensuring the platform's reliability and performance, addressing any issues promptly to provide a seamless experience for users seeking nutritional insights.

`PHP`

Outsourcing projects
📁 Web app 👤 Developer 📅 2013 - 2018

During my tenure at Quantic, I engaged in various outsourcing projects primarily from Japan, which allowed me to broaden my expertise across a multitude of languages and technologies, including .Net (C#), Java (SpringBoot, Java Swing, Java Web, SA Struct), Mobile (Android, PhoneGap), NodeJs, ReactJS, PHP, and Wordpress. Noteworthy projects include the Solar Cell Draw Plugin for AutoCAD, Logic Chart for electrical circuit diagrams, Gaze Finder for patient identification, EBM MLS for e-learning, and management systems like EDaise, Hydrogen, and Ishinomaki for industrial applications.
